INTRODUCTION
Kilparrin Teaching and Assessment School and Services (Kilparrin) has developed a Sun Protection Policy and a Sun Care Plan to minimise the danger of excessive ultra violet radiation (UVR) and infrared radiation (IRR) exposure for learners and staff.

This policy has been developed in line with the SunSmart Primary School Policy Guidelines (Cancer Council SA).

REDUCING PERSONAL ULTRA VIOLET RADIATION (UVR) EXPOSURE
Skin Protection Strategies
Skin protection strategies are in place from the beginning of September until the end of April and when the ultraviolet radiation (UVR) level is 3 and above at other times.

Hats and sunscreen are to be supplied by the family. Sunscreen and hats should be worn by learners at recess and lunchtime, on excursions and at other high-risk times. High-risk times are 10:00am–2:00pm (11:00am–3:00pm daylight saving time) and on very hot and sunny days. Recommended hats are broad brimmed, legionnaire or bucket style hats (bucket hats must have a deep crown and a 6cm brim). Baseball caps are not allowed.

Sunscreen is applied according to the individual learner’s Sun Care Plan.

Wearing sun protective clothing (loose, closely woven cotton fabrics, shirts with a collar) is encouraged.

Use of shaded areas will be maximised. Learners who will not keep hats on when outside on sunny days and at other high-risk times must be kept in the shade.

Outdoor activities such as evacuation drills, excursions and physical activities will be scheduled with the high-risk times in mind.

Staff are expected to model sun-safe skin protection practices.

Sun Care Plan
The Kilparrin Sun Care Plan is to be completed by the parent/caregiver upon enrolment, and updated at the beginning of each year and as required.

INFRARED RADIATION (IRR) AND HEAT PROTECTION
Overexposure to heat occurs when the body’s temperature control system cannot cope with heat in the environment. All staff are responsible for implementing the DECS OHS&W Heat Stress Procedure and the DECS OHS&W UV Radiation/Sun Protection Procedure. 

In addition to the skin protection procedures outlined above, Kilparrin staff will encourage learners to increase their fluid intake during hot weather.

When the official weather forecast for the day is 36° Celsius or above and the outside temperature has reached 36° Celsius or above, learners will be kept inside and the Inclement and Wet Weather Yard Duty Procedures will be implemented.

Kilparrin Teaching & Assessment School and Services Sun Care Plan

Document 7: August 2011 (Approved at staff Meeting 8 August 2011)
To be reviewed in 2013 or earlier if needed
Wet Weather
If it is raining assume that *Inclement and Wet Weather Yard Duty Procedures* apply.

If the rain is intermittent, or if it is wet underfoot, the decision to enact *Wet Weather Yard Duty Procedures* is made by the teacher on duty before the play session commences (preferably by 10:30am for recess and 12:30pm for lunch).

It is the responsibility of the teacher on duty to let all classes and other staff on duty know of their decision.

*It is the individual class teacher’s decision to take their learners out or to keep them in at recess or lunch and it is their responsibility to ensure that supervision is provided.***

Inclement Weather

*Hot weather*
When the official weather forecast for the day is 36° Celsius (see Day Sheet) or above and the outside temperature has reached 36° Celsius, the *Inclement and Wet Weather Yard Duty Procedures* outlined below will be followed.

It is the individual class teacher’s decision to take their learners out or to keep them in at recess or lunch and it is their responsibility to ensure that supervision is provided.

*Hot/Humid weather*
The decision to keep learners inside during recess or lunchtime because of the hot and/or humid weather when the official weather forecast for the day is below 36° Celsius remains at the discretion of the class teacher. *If that teacher is scheduled as the duty teacher s/he needs to organise a replacement teacher to do their scheduled outside duty.*

*Note: It is anticipated that this will only apply to a small number of learners.*

It is the individual class teacher’s decision to take their learners out or to keep them in at recess or lunch and it is their responsibility to ensure that supervision is provided.

*Cold weather*
The decision to keep learners inside because of the cold, during recess or lunchtime, remains at the discretion of the class teacher. It is the individual class teacher’s decision to take their learners out or to keep them in at recess or lunch and it is their responsibility to ensure that supervision is provided. *If that teacher is scheduled as the duty teacher s/he needs to organise a replacement teacher to do their scheduled outside duty.*

*Note: It is anticipated that this will only apply to a small number of learners.*

---

**Inclement and Wet Weather Yard Duty Procedures**

Learners remain indoors in their own class groups with recreation activities provided under the supervision of their teacher for recess and/or lunch.

Class SSOs remain on duty as per their rosters.

Updated: August 2011
To be reviewed in 2013 or earlier if needed.
Sun Care Plan
CONFIDENTIAL

To be completed by the PARENT/CAREGIVER.
This information is confidential and will be available only to supervising staff and emergency medical personnel.

To the Parent/Caregiver
Skin protection strategies will be implemented by Kilparrin staff from the beginning of September until the end of April and at other times when the ultraviolet radiation (UVR) level is 3 and above.

Hats
Hats must be worn for all outside activities from the beginning of September until the end of April and at other times when the ultraviolet radiation (UVR) level is 3 and above.
The provision of an appropriate hat is the responsibility of the family. Recommended hats are broad brimmed, legionnaire or bucket style hats (bucket hats must have a deep crown and a 6cm brim). Baseball caps are not allowed.

Sunscreen
Please note that education workers:

- accept only sunscreen that has been provided by a parent/caregiver in the original, fully labelled container
- do not monitor the effects of applications as they have no training to do this
- are instructed to seek emergency medical assistance if concerned about a learner's reaction following sunscreen application.

Please complete all sections of this form and:

- schedule application of sunscreen outside school hours wherever possible
- be specific: “as needed” is not sufficient direction for staff members, they need to know exactly when the application of sunscreen is required
- nominate the simplest method. (For example: 8 hour sunscreen)

Name of learner……………………………………………. Date of birth……………..
Family name (please print) First name (please print)

Medic Alert number (if relevant)…………………………………….. Review date………………..

</tbody>
</table>

Hat provided (please tick ☑) Yes ☐ No ☐

Please note:
- wherever possible, safe self-management of sun protection is encouraged
- young learners who are able to apply their own sunscreen will be supervised
- when the learner is unable to apply their own sunscreen, staff will follow the application instructions as described above.

AUTHORISATION

I have read, understood and agree with this plan and any attachments indicated above.
I approve the release of this information to education staff.
I understand that staff will only apply sunscreen provided by me and according to the instructions I have given above.
